### Maryland Hospital Pricing Guide

Prepared by

Maryland Health Services Cost Review Commission

May 2006

#### Introduction

In today's complex and ever-changing health care market, consumers are becoming more and more responsible for their own health care, including its costs. This Guide provides you with information you can use to understand Maryland's hospital market and to make informed health care purchasing decisions.

#### All Payer Rate Setting System

The Health Services Cost Review Commission (HSCRC) was established by the General Assembly in 1971. The seven-member Commission is responsible for reviewing and approving rates that hospitals can charge for their services and making financial information about Maryland hospitals available to the public. The HSCRC sets rates for all payers – private insurance companies, HMOs, Medicare and Medicaid. This system is referred to as the "all-payer" system where all payers pay for their fair share of hospital costs.

In establishing the HSCRC, the Maryland General Assembly set out to accomplish the following objectives:

- keep hospital services affordable;
- expand access to hospital care for those without insurance; and
- provide accountability for hospital performance to the public and state government.

#### **Purpose**

This Guide has been prepared to provide information about the differences in charges among Maryland's hospitals for similar types of inpatient admissions and outpatient procedures. The charges in this report are annual averages and provided for illustrative purposes only. Your bill may differ from the charges shown in these tables. Your actual bill reflects your use of services during your stay and the hospital's charges at the time of your admission.

### 15 Most Common Inpatient Diagnosis Categories

As part of its rate-setting activities, the HSCRC collects data from hospitals which it uses to monitor hospital utilization and charges, and to help set rates. These data were used to generate the statistics reported in this section.

Each hospital admission is grouped into an "All Patient Refined Diagnosis Related Group" (APR-DRGs) that classifies patients into clinically cohesive groups based on patient medical condition and severity of their illness. There are 320 APR-DRGs that are divided into four "severity of illness" levels. *Table 1* provides information on the 15 most common inpatient APR-DRGs as reported by Maryland hospitals for admissions

during July – March, 2006. For each acute care hospital in Maryland, the table lists the number of cases in the APR-DRG, the average charge per case, and the average charge per day. The 15 most common APR-DRGs for all Maryland hospitals combined may or may not be commonly encountered at any particular hospital.

#### **Statistics**

The number of "Cases" is the number of discharges between July 1, 2005 and March 31, 2006 within that APR-DRG. The number of cases was used to determine the 15 most common APR-DRG. Counts for hospitals with fewer than 6 cases within an APR-DRG are not reported. The "Average Charge per Case" is the average charge for cases in the APR-DRG at each hospital after the charge has been weighted by the statewide severity distribution for the APR-DRG (this creates a severity-adjusted average charge). The average charge does not include physician professional fees. The "Average Charge per Day" is the severity adjusted average charge divided by the average length of stay for patients in an APR-DRG at each hospital.

Each hospital's average charge can be affected by a number of factors, including:

- Patients' severity of illness.
- Wage levels and the price of goods and services in its area.
- The amount of teaching it does.
- The amount of uncompensated care it provides.

These factors are reflected in the amount Maryland hospitals are allowed to charge for services.

**Note:** The charges provided are to be used as a guide only. Your bill may differ from the charges shown in these tables. *These charges reflect annual averages*. Your bill reflects your use of services during your stay and the hospital's charges at the time of your admission.

#### How to Use the Tables in this Guide

Table 1 begins on page 5. It shows charges for the fifteen most common inpatient diagnoses. The APR-DRGs are presented in order starting with the most common.

```
APR-DRG 640 - Newborn
APR-DRG 560 - Vaginal Delivery
APR-DRG 540 - Cesarean Delivery
APR-DRG 194 - Heart Failure
APR-DRG 139 - Pneumonia
APR-DRG 203 - Chest Pain
APR-DRG 198 - Angina Pectoris & Coronary Atherosclerosis
APR-DRG 140 - Chronic Obstructive Pulmonary Disease (COPD)
APR-DRG 720 - Septicemia & Disseminated Infections
APR-DRG 383 - Cellulitis & Other Skin Infections
APR-DRG 175 - Percutaneous Cardiovascular Procedures
APR-DRG 302 - Knee Joint Replacement
```

APR-DRG 201 - Cardiac Arrhythmia & Conduction Disorders APR-DRG 751 - Major Depressive Disorders & Other Psychoses APR-DRG 463 - Kidney & Urinary Tract Infections

#### TABLE 1

#### INPATIENT DATA FOR JULY 2005 - MARCH 2006

Top Fifteen All Patient Refined Diagnosis Related Groups (APR-DRG) An asterisk indicates a cell with count < 6.

APR-DRG 640 - Neonate birth wt > 2499g, normal newborn or w/ other problem: This APR-DRG refers to charges for a newborn baby that weighs at least 5  $^{1}$ /2 pounds
